Index, Volume 34 (1993)

The index covers all contributions except lists of publications. The Subjects section aims to record all the ethnic groups, sites, and major culture-historical units mentioned in these contributions and the main topics discussed; references are listed only when they are central to an article's argument or constitute a major data source. Because space is limited, neither systematic internal subdivision of entries nor cross-referencing is attempted. The Contributors section lists the authors of all contributions.
